

Interactive Patent Search with IPC Query Expansion

Parvaz Mahdabi

Linda Andersson

A patent retrieval system

- User's input: keywords (default: and search)
- Search in IPC classes
 - System matches keywords to the IPC classes (subgroup level)
 - Original query is expanded with a set of keywords extracted from the selected classes
- Search in Patent Documents
 - The selected classes are used for IPC filtering (class level)
 - System returns a list of relevant documents (with title)

Search IPC Classes

Found 10 results.

	<i>IPC class</i>	<i>Score</i>	<i>URL</i>

Future Work

- Support for Boolean and proximity search
- Link to real document, keywords highlighted
- Popup for abstract
- IPC collocation
- Add date range
