

Noriko KANDO'S Biography

Noriko Kando is a professor in the Information-society Research Division of the National Institute of Informatics (NII), Tokyo, Japan, and has been co-appointed as a professor in the Department of Informatics of the Graduate University of Advanced Studies, Japan. She initiated NTCIR, a large-scale evaluation of information-access technologies, such as information retrieval, summarization, question answering, and text mining, using East Asian languages and English documents, and has been a main designer of various tasks including cross-lingual retrieval, patent retrieval, and opinion analysis, which have attracted international participation. She has been leading various projects including ones for exploratory-search systems. She received her Ph.D. from Keio University in Library and Information Science in 1995 and has been teaching and conducting research at NII since then. She has had more than 100 of her scientific articles published in journals and by international conferences, and has been an invited speaker at many international conferences and workshops. She was an Asian representative for the ACM-SIGIR Executive Committee from 2003 to 2007, and a Program Co-Chair of ACM-SIGIR 2007.
